KELSHAD CYBER SYSTEMS AND TECHNOLOGIES LLC

KST-ORG-007-REV2026-10 · PUBLIC BRIEF

Company Profile and Platform Portfolio

ISSUED

2026-10-17

AUTHOR

Joshua Kelsey Bass, Founder, Chairman and Chief Executive Officer

SUPERSEDES

None. First issue.

CURRENT STATUS

Kelshad Cyber Systems and Technologies LLC (KCST) is an early-stage, veteran-led software company. RxOmniMedLink is in controlled private alpha. Light of Joshua is built and has not yet launched to live clients. The energy platform is in research and development. No platform described here is processing live protected health information or live client case data. Partnerships marked "forming" are not executed agreements.

1. Purpose

This brief describes who KCST is, what it builds, and the current stage of each platform. It is written for prospective partners, clients, investors, and reviewers who want an accurate picture before a first conversation. Each platform has its own technical briefs in the KCST Trust Center, and those briefs govern wherever they are more specific than this one.

2. The Company

KCST is a Florida limited liability company, document number L26000296916, headquartered at 7901 4th Street North, St. Petersburg, Florida 33702.

KCST builds and owns software platforms for systems people depend on and that often fail them through fragmentation: prescriptions, housing assistance, and, in research, energy. KCST also builds software for clients through its Development Studio and delivers branding and growth services through its client services division, Novox Executive Solutions (see KST-STUDIO-008).

Leadership

PERSON	ROLE
Jazmine Jardelina Bass	Co-Founder and Owner. United States Coast Guard veteran, honorable discharge
Joshua Kelsey Bass	Founder, Chairman and Chief Executive Officer

PERSON	ROLE
Brent A. Bollinger	Chief Quality Officer and Founding Investor. United States Marine Corps veteran

KCST also uses an Executive Advisory Board made up of artificial intelligence advisory systems. They are not employees, officers, or directors, and they hold no authority to bind the company. All binding decisions rest with KCST's human leadership.

"Veteran-led" describes the leadership above. KCST has not completed any formal veteran-owned, service-disabled veteran-owned, or woman-owned small business certification, and makes no such claim.

3. Platform Portfolio

PLATFORM	SECTOR	STAGE AS OF 2026-10-17
RxOmniMedLink	Healthcare: prescription coordination between prescribers, pharmacies, and patients	Controlled private alpha. Synthetic test data only
Light of Joshua	Housing: coordinated intake, case management, and verified payments for homelessness response	Built. Pre-launch. Not yet serving live clients
Energy platform	Nuclear-energy sector software	Research and development only
Government programs	Public-sector systems and support	Early program work. No public-sector contract is represented here

3.1 RxOmniMedLink

RxOmniMedLink is designed to connect prescribers, pharmacies, and patients on one verified prescription record so that a script can be written, checked, and filled without the gaps that delay care. It is built around HIPAA-aligned controls, and clinical users are identity-proofed to a NIST SP 800-63-3 IAL2 standard using Stripe Identity.

What RxOmniMedLink does not do today is stated in full in KST-IDV-001 through KST-PRIVACY-006. In summary: it is not using live protected health information, is not transmitting live prescriptions, does not support controlled-substance prescribing, has not completed Surescripts onboarding, has not completed the third-party audit and certification required for EPCS, and has not completed a SOC 2 audit. No integration with Epic, Cerner, or any other EHR vendor has been tested or established.

3.2 Light of Joshua

Light of Joshua is a single portal built to help reduce homelessness by connecting the parties who already hold the pieces: housing programs and their funding, caseworkers, property owners and hosts, and the individuals and families who need housing. It is designed to speed intake, simplify case management, and structure verified payments so that vacant units can be funded and filled while the need is urgent.

Light of Joshua is built and has not launched. It is not processing live case data, and no program, agency, or funder is represented here as a current user or partner. Programs named on the KCST website, such as SSVF and Tunnel to Towers, are examples of the kinds of programs the platform is designed to serve, not organizations KCST has an agreement with.

3.3 Energy Platform

KCST is researching software for the nuclear-energy sector, applying the same secure engineering practices used in its healthcare and housing work. This is research and development only. There is no product, customer, or regulatory approval to report.

3.4 Forming Partnerships

KCST is in discussions with LARUS Healthcare of Lithuania about a possible alliance pairing allied-manufactured medical hardware with the RxOmniMedLink software layer. No agreement has been executed. Details will be published only upon formal announcement.

4. How We Describe Ourselves

KCST holds itself to a written External Representation Standard. The parts that matter most to a reader of this brief:

- Stages are stated plainly. A platform is not called "live," "launched," or "production" until it is.
- Certifications are named only when they are held. KCST holds no HIPAA, EPCS, SOC 2, FedRAMP, or Surescripts certification. No HIPAA certification exists in United States law.
- Dates for future phases are internal targets, not commitments, and are omitted from public material.
- Diagrams of designed but unbuilt systems are labeled "Proposed future state."
- KCST does not describe another company's product, requirements, or acceptance criteria.
- KCST does not publish invented customers, logos, testimonials, site counts, transaction volumes, or revenue figures.

If anything in a KCST document or on a KCST surface reads as stronger than this, the stricter statement governs, and we would like to hear about it at info@kelshad.com.

5. Document Control

Kelshad Cyber Systems and Technologies LLC, a Florida limited liability company, document number L26000296916. 7901 4th Street North, St. Petersburg, FL 33702. info@kelshad.com. (813) 982-8779.

This brief will be revised when any platform changes stage, when any partnership is executed or ended, or on the next scheduled review, whichever is earliest.
